# How to Use This PDF

## Pick a Pattern

Choose any design from this bundle.

Every pattern is shown on a clear grid so you can follow it bead-by-bead.

## Prepare Your Beads

You'll see a list of all colors and how many beads you'll need.

Use Perler, Hama, or Nabbi—everything works!

## Build on the Pegboard

Place beads on your pegboard using the full-page pattern as a guide.

You can even place a transparent 29x29 pegboard directly on top of the printed page for perfect alignment.

## Check the Preview

Each page includes a photo showing what the finished project looks like.

This helps you double-check colors and shape.

## Iron Your Design

**Ironing should always be done by an adult.**

Cover with parchment paper and iron slowly and evenly.

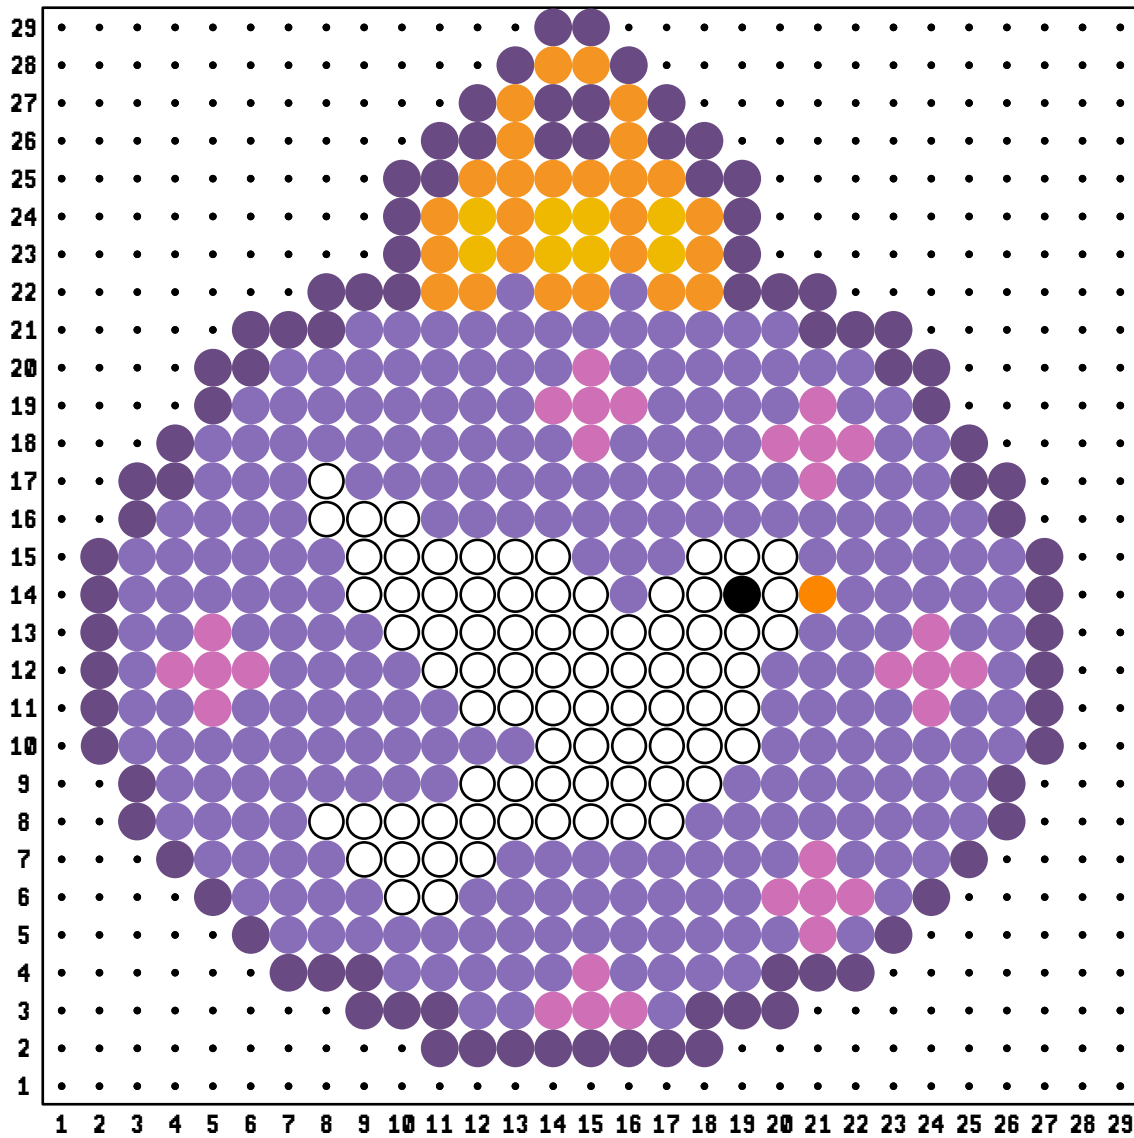

Need help? You'll find ironing tips and beginner guidance on PixelPeeters.com under Tips & Tricks.

## Let It Cool

Wait until your design is fully cooled so the colors stay bright and the shape stays strong.
